The Webley Bolt Action .410 Gun

SPECIFICATION :

Barrel: Length, 25½". Modified choke, 2½" chamber, bead fore-sight.

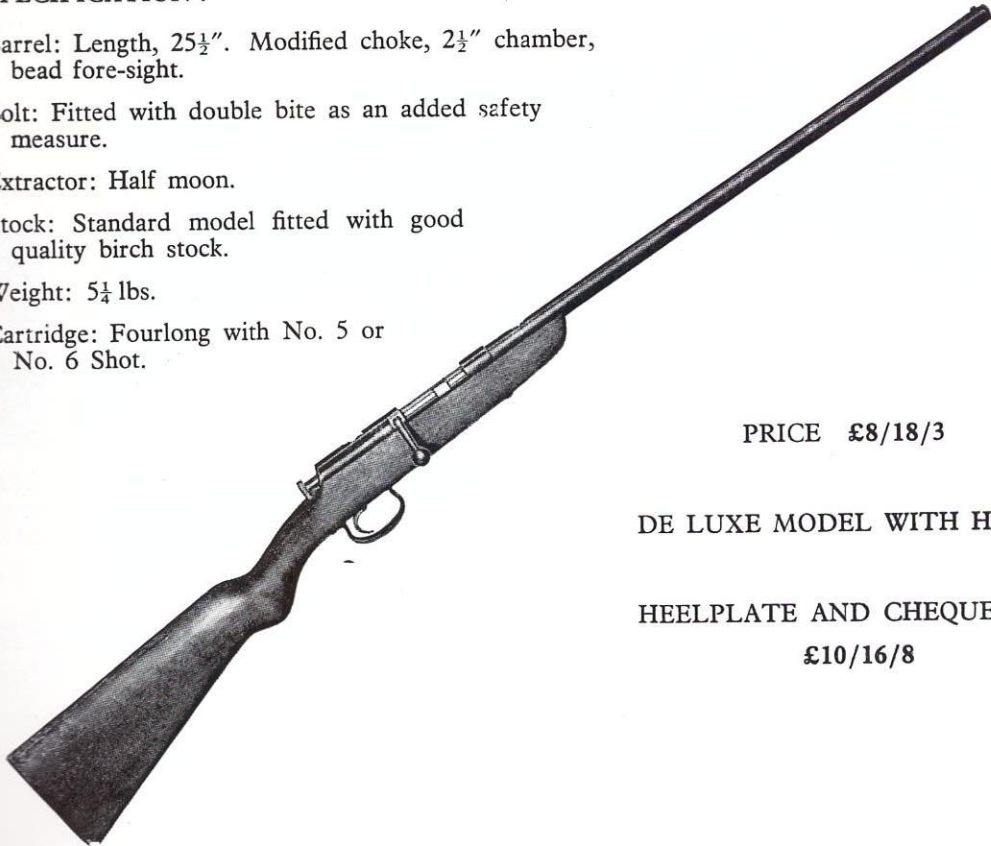

Bolt: Fitted with double bite as an added safety measure.

Extractor: Half moon.

Stock: Standard model fitted with good quality birch stock.

Weight: 5¼ lbs.

Cartridge: Fourlong with No. 5 or No. 6 Shot.

PRICE £8/18/3

DE LUXE MODEL WITH HORN

HEELPLATE AND CHEQUERED

£10/16/8

This model has been introduced to meet the demand for a low priced gun of sound construction. The bolt, as well as being fitted with double bite, is designed so that the gun can only be fired when the bolt is in the fully closed position. Please read carefully the instructions given with each gun.

All guns are patterned with No. 6 shot before leaving the works, and give approximately 77 pellets in a 30in. circle at 40 yards. No. 5 shot has a slightly higher remaining velocity at 40 yards, being approximately 600 ft. secs. against 580 ft. secs. for No. 6, but with No. 5 there would of course be proportionately fewer pellets in the pattern.

In addition to factory tests, each gun is independently proofed by the Birmingham Gun Barrel Proof House, and bears the relative proof marks.

For packing or storage purposes the barrel can be detached from the stock by removal of two screws.

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

GUNS

The Webley Single Barrel Semi-Hammerless Ejector

The Webley single barrel gun needs no introduction; thousands are in the hands of satisfied users in all parts of the world. It is a thoroughly sound and reliable general purpose gun, strongly built to withstand hard wear, with long range and hard hitting power. Each gun is hand finished and individually tested.

The action has Webley's patent ejector mechanism and V mainspring.

The safety mechanism is actuated by depressing the top lever which simultaneously withdraws the striker, leaving the gun in the half-cock position.

Loading and unloading can now be accomplished with perfect safety.

- | | | | | |

SOUND MODERATOR

Shoot Silently

with the

Parker-Hale
LIMITED
SOUND MODERATOR

BECAUSE IT ELIMINATES MOST OF THE NOISE MADE BY GUN REPORT, THE ADVANTAGES INHERENT IN THE USE OF THE SOUND MODERATOR ARE OBVIOUS. THE FITTING OF THIS UNIT WILL NOT AFFECT THE ACCURACY OF THE RIFLE.

PARKER HALE LTD., BISLEY WORKS, BIRMINGHAM 4

HOW THE MODERATOR OPERATES.

The Moderator checks the muzzle blast. Instead of the powder gases being liberated into the air instantaneously when the bullet emerges from the muzzle, they are caught by the Moderator and allowed to escape gradually.

This is accomplished by the baffle plates which are so constructed as to offer a very high resistance to a rapid flow of gas through them, but very little resistance to a slow flow of gas.

The hole in the baffle plates is larger than the bullet and, therefore, the latter does not touch anything in passing through, consequently accuracy of flight and velocity are just the same with as without the attachment.

HOW MUCH IT REDUCES THE NOISE.

It annuls almost all the noise of the gun report. On high power rifles it also reduces the recoil over two-thirds. The reason for this is that there is a very strong tendency for the Moderator to be blown off the end of the gun. This tendency amounts to a forward pull on the barrel. This forward pull counter-balances part of the backward kick.

The noise that the Moderator does not control is the noise made out in the air beyond the gun by a bullet in its flight. This noise is a "crack" like the crack of a whip and not a "whistle" or a "shriek" as is commonly supposed. The noise is made by the same thing that causes the air to crack when a whiplash is snapped. This noise cannot be avoided when the bullet velocity exceeds 1,075 feet per second, the speed of sound.

Sound Moderators as a consequence are most efficient when used on small bore rifles such as .22 calibre rim fire, with ordinary velocity Short or Long Rifle cartridges, for these bullets fly at a speed less than sound and therefore do not make "bullet flight noise." All the high speed brands of .22 calibre rim fire cartridges make this noise and their use should, therefore, be avoided if silence is desired.

As illustrated above.

List No. N.M.1. For low power rifles up to .25 calibre.

Length $6\frac{7}{8}$ " Diameter $\frac{7}{8}$ " Weight $5\frac{1}{2}$ ozs.

Price with Thread Cap and Assembling Tool, 32/6 Our charge for screw cutting barrel, 20/- if ordered separately.

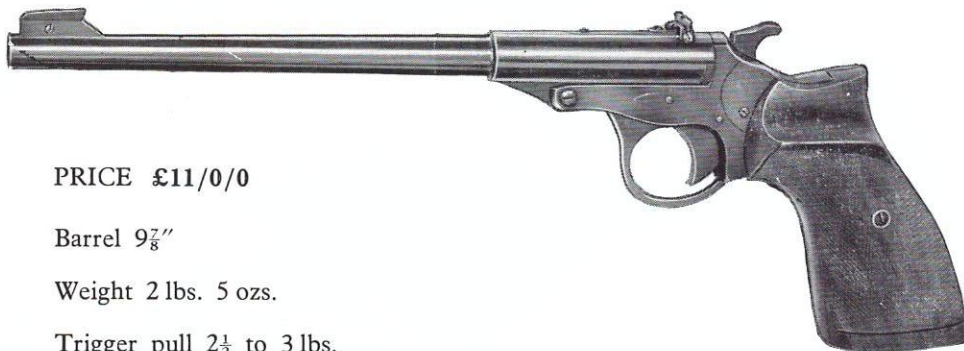

Persons who require Sound Moderators fitted to their rifles, etc., must apply to the police to have their Firearms Certificates varied to enable them to acquire one under the Firearms Consolidation Act of 1937.

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

At 40 yds. " " " $1\frac{1}{4}$ " x $1\frac{1}{4}$ " .177
At 40 yds. " " " $1\frac{3}{4}$ " x $1\frac{3}{4}$ " .22

CHOICE OF CALIBRES.

We are often questioned as to the difference between the .177 and .22 calibre. Whilst final selection must rest with the purchaser, the following details are submitted as a guide. The .177 calibre is invariably used in Clubs, as it is the standard calibre for all League and other competitions under S.M.R.C. throughout the country.

The .177 pellets are only half the price of the .22. The .177 has a higher muzzle velocity than the .22, but if the rifle is required for shooting rooks, rabbits, sparrows, etc., then the .22 calibre is essential, as the .177 pellet is not sufficiently heavy for the purpose, and the greater shock resulting from the larger pellet is much more likely to be effective at longer ranges.

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

AIR RIFLES

B.S.A. Air Rifles

B.S.A. "CADET"

PRICE £5/15/2

A light easy to handle .177 junior air rifle, sufficiently powerful to kill vermin at ranges of up to 30 yards. Length of barrel 15". Overall length 37 $\frac{3}{4}$ ". Sight base 12 $\frac{1}{2}$ ". Weight 4 $\frac{3}{4}$ lbs.

B.S.A. "CADET MAJOR"

PRICE £6/9/11

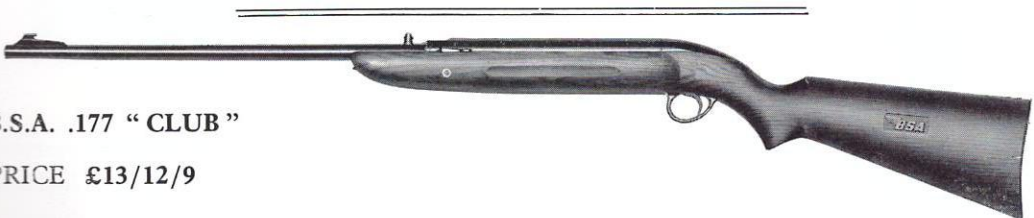

Larger and more powerful than the Cadet, the .177 "Cadet Major" is accurate up to 40 yards, fitted with adjustable rearsight and adjustable trigger pull. Bore .177. Length of barrel 18 $\frac{1}{2}$ ". Overall length 42". Sight base 16". Weight 5 $\frac{1}{4}$ lbs.

B.S.A. .177 "CLUB"

PRICE £13/12/9

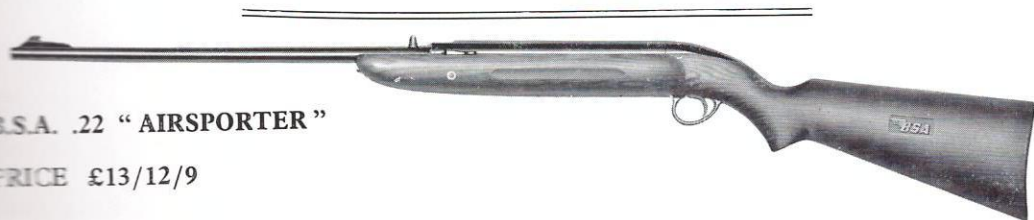

Ideal for the serious air rifle marksman, this weapon has been produced for close range target shooting, but is equally suitable for the destruction of pests up to 50 yards range. Fitted with adjustable sighting. Length of barrel 20". Overall length 44". Weight 7 $\frac{1}{2}$ lbs. Calibre .177.

B.S.A. .22 "AIRSPORTER"

PRICE £13/12/9

Identical in design to the "Club" Model, this rifle is eminently suitable for shooting small pests and other vermin up to 60 yards. Length of barrel 20". Overall length 44 $\frac{1}{2}$ ". Sight base 16 $\frac{1}{2}$ ". Weight 8 lbs.

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

AIR PISTOLS

The Webley Junior Air Pistol

CALIBRE .177 ONLY ($4\frac{1}{2}$ mm.)

Patented in all the Principal Countries of the World.

Weight of Pistol, 24 ozs.
Length overall, $7\frac{3}{4}$ "
Length of Barrel, $6\frac{1}{8}$ "
Smooth bore.

Each Pistol is supplied in cardboard box containing samples of WEBLEY Special Pellets and Darts, also Spare Barrel Joint Washer.

For highest accuracy use
WEBLEY Special Pellets

The Webley "Junior" Air Pistol offers the best opportunity for boys, through their own earnest endeavours, to become crack shots. It teaches steadiness of hand and eye, and is a faultless practice weapon which can be used in room, hall or garden with perfect safety.

The "Junior" Air Pistol, as illustrated, is the outcome of long experience in the manufacture of air pistols. It is entirely British made throughout and will be found thoroughly reliable in every respect.

As the barrel of this pistol is smooth bore (not rifled) Webley Darts can be used without fear of damaging the pistol. Darts can be used in the Senior and Mark I models, but there is a risk of damaging the rifling unless an additional smooth bore barrel is purchased.

PRICE £3/19/3

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

AIR PISTOLS

The Webley "Mark I" Air Pistol

CALIBRE .177 or .22

Perfect Shooting.

Perfect Simplicity.

Perfect Safety.

Weight, 30 ozs.
Length overall, 8½"
Length of Barrel, 6½"
Machine Cut Rifling.

For highest accuracy use
WEBLEY Special Pellets

PRICE £5/10/9

The "**WEBLEY**" AIR PISTOLS are designed on scientific lines, machined on the interchangeable system, and spare parts can be obtained at little expense.

Extraordinary accuracy can be obtained with these pistols, and they will appeal to all classes of buyers both for individual practice and for friendly rivalry in competitions.

The rifled barrel being interchangeable, it is thus possible to possess both calibres in one pistol.

Each pistol is supplied in cardboard box containing **WEBLEY** Special Pellets and Spare Washer, also full instructions.

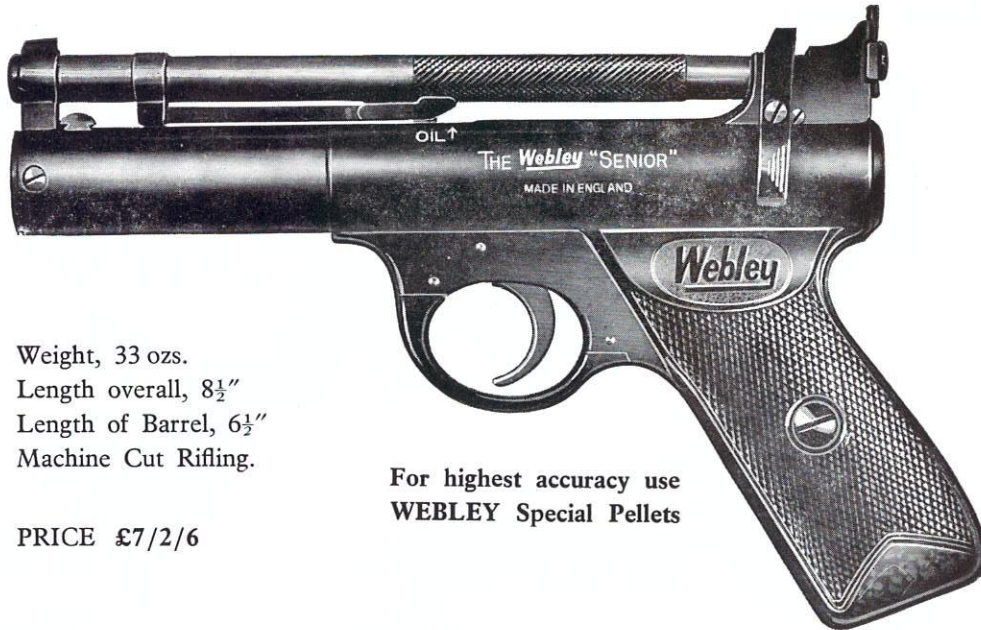

Webley oil has been selected for its flash-point and lubricating properties, and is equally suitable for internal and external lubrication of pistols and rifles. Obtain a supply in order to maintain velocity.

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

AIR PISTOLS

The Webley Senior Air Pistol

CALIBRE .177 or .22

Weight, 33 ozs.
Length overall, 8½"
Length of Barrel, 6½"
Machine Cut Rifling.

For highest accuracy use
WEBLEY Special Pellets

PRICE £7/2/6

The **WEBLEY "SENIOR" AIR PISTOL** is the latest Model de Luxe. It contains the leading points of the "Mark I" Air Pistol, with the following important additions:—

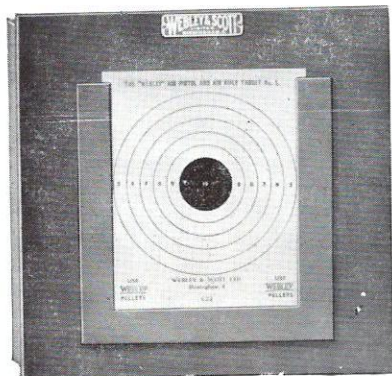

1. Adjustable Backsight (both Lateral and Vertical), which is capable of being regulated.
2. Fitted with a special sear mechanism, which ensures a light pull-off and obviates the necessity of a trigger adjusting screw.
3. The cocking of the Pistol by means of the barrel has been enormously facilitated by the addition of a **patent** double joint, which assists in the leverage to such an extent that any young person can easily operate it.
4. The top catch of the "Mark I" is replaced by a Webley Revolver stirrup, this giving an absolute and positive lock.
5. The barrel has been considerably strengthened.
6. Piston is fitted with special Metal Ring in place of Leather Washer, giving increased velocity and durability. Use Webley Oil.
7. The butt of the Pistol is serrated to ensure a perfect grip.

Each Pistol is supplied in cardboard box containing **WEBLEY Special Pellets**, Spare Washer and Instructions. All Webley Air Pistols are stripped from the Muzzle end.

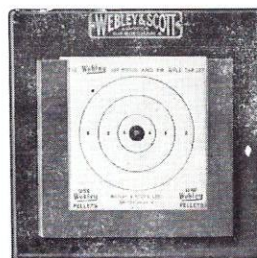

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

AIR RIFLE AND PISTOL ACCESSORIES

Target Holders and Targets

23/9
each

19/-
each

10 x 10 x 1". For use at 10 or 20 yards.
Targets 4/- per 100.

6½ x 6½ x 1". For use at 5 yards.
Targets 2/- per 100.

The above Target Holders have been specially designed for outdoor or indoor use, and are so arranged that the Pellets, after passing through the cardboard Targets, are trapped and caught.

Webley Special Pellets and Darts

No. 1 .177 (4½ mm.)
2/11 for 500.
Postage 1/-

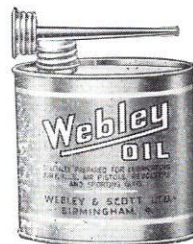

No. 2 .22 (6 mm.)
4/3 per 500.
Postage 1/-

DARTS
.177 and .22
2/1 per doz.

The Webley Oil is marketed only to enable users to obtain the maximum velocity and efficiency from their pistol or rifle. Tin is fitted with spout. Price 1/6. Postage 1/-

For the best shooting results it is essential to use Webley Special Pellets, which are obtainable from all leading Stores and Gun Dealers. Do not be put off with a substitute which will not give the accuracy and velocity for which the pistol or rifle is tested.

The Webley Pellets are carefully gauged to the machine cut rifling of the barrel.

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

AIR RIFLE AND PISTOL ACCESSORIES

Licences, Etc.

Re AIR PISTOLS AND AIR RIFLES

The position in **Great Britain** with regard to the above is as follows:—

No Firearms Certificate is necessary for the purchase of the Air Pistols or Air Rifles, and they can be used without a Firearms Certificate or Gun Licence in your home or grounds, but if they are taken outside, then they become subject to the existing laws in connection with shooting on the highway, and with regard to Licences.

Overseas Customers should ascertain the regulations which apply in their particular area either from our Agents or the Local Police.

FIREARMS ACT, 1937.

Air Rifles, Air Pistols, Pellets and Darts.

Age	Buying or Hiring	Having in Possession
Under 14	Prohibited	Allowed
14—17	Prohibited	Allowed
17 and over	Allowed	Allowed

From the above it will be seen that anyone desiring an Air Pistol, or Air Rifle, is allowed to use one but would have to get his parents to purchase it for him. The restriction also applies to Pellets and Darts.

The provisions of the Gun Licence Act, 1870, apply to Air Pistols and Air Rifles, and accordingly, subject to the exemptions provided in the Act, a licence is necessary if such a weapon is used or carried elsewhere than in a dwelling house or the curtilage thereof.

No age limit is laid down in the act for the purchase of a 10/- Gun Licence from the Post Office, where such licence becomes necessary in order to comply with the law.

Parker-Hale Rods: Air Rifle

CELLULOID COVERED AIR RIFLE CLEANING ROD

Complete with brush and loop.

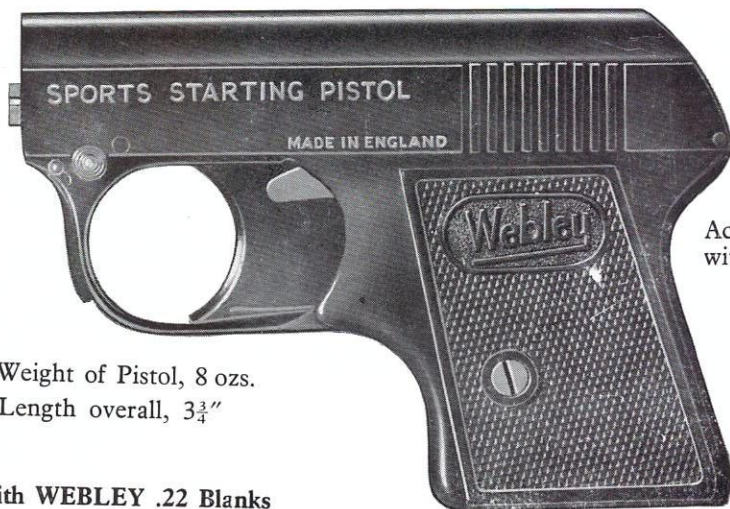

Although Air Rifles do not corrode from the same cause as Powder Rifles, they are liable to rust with change of temperature if the bore is left dry. It is therefore essential that the barrel be slightly greased with the brush after use and the oil wiped out with a piece of flannelette before using again.

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

SPORTS STARTING PISTOL

The Webley Sports Starting Pistol

Actual size of pistol
with small stock sides
(Mark 1)

Weight of Pistol, 8 ozs.
Length overall, 3 $\frac{3}{4}$ "

For use with **WEBLEY .22 Blanks**

This is a neat and compact pistol for firing .22 short crimped blank cartridges. The magazine holds 6 blanks which are fed and fired consecutively by pressing the trigger each time. An extra pull on the trigger will eject the empty magazine for reloading. It will be found suitable for sports meetings, theatrical purposes, training gun dogs, scaring birds, etc.

The pistol is supplied in pocket size box with full instructions, also a brush to remove fouling from the magazine.

It is safe as it is designed to take only .22 blank cartridges and it is impossible to insert a bulletted cartridge.

Firearms Certificate, Gun Licence or Permit is NOT required for the pistol or blank cartridges in Great Britain, but they must not be purchased by anyone under 17 years of age.

To ensure maximum safety and to avoid damage to the pistol follow carefully the simple instructions for firing issued with each pistol.

Whilst this pistol will take other blank cartridges, its functioning can only be guaranteed when Webley .22 blanks are used. The Webley cartridges have been produced after much experiment to ensure maximum safety, functioning and detonation. Misfires and jamming of the magazine may occur when blank cartridges other than Webley are used.

Larger stock sides, at slight extra cost, have been designed for those who prefer a larger grip. Unless otherwise stated all pistols are supplied with the small sides as illustrated.

Order reference for pistol complete with large stocks "Starting Pistol, Mark 2."

PRICE 36/-

GUN ACCESSORIES

Parker-Hale Shotgun Cleaning Outfits

Provide in compact form everything necessary to the efficient cleaning and preservation of your gun.

“CLANSMAN” CLEANING OUTFIT

List of Contents

This outfit contains sufficient implements for the efficient cleaning of any gun by the Parker-Hale method; put up in an attractive tartan box fitted with compartments and containing:

- 1 Two-piece jointed celluloid covered steel rod.
- *1 Flexible jag.
- *1 “Double Twist” Phos. bronze wire brush.
- *1 “Double Twist” bristle brush.
- 1 Pkt. (40) shotgun patches.
- 1 5-oz. tin Young’s “303” Cleaner and Rust Preventer with “Valvespout”—the “Valvespout” is absolutely leakproof; a half turn of the nozzle opens or closes it.
- 1 Yellow duster.

32/1 each

*Outfits can be supplied to suit 12, 16, 20, 28 g. and .410 guns; when ordering please specify gauge of gun for which required so that correct size implements may be sent. If the outfit is required for cleaning more than one size of gun only the items marked * need be purchased additionally.

Jute Tow

Jute Tow is a useful cleaning material provided it is only used once.

As it is normally used, a matted mass of it adheres to the old fashioned jag and defies all efforts to dislodge it short of burning it off. As a consequence, it is used again and again and becomes charged with acid fouling which quite neutralises the common oil usually provided by inexpert salesmen, and a high class gun can be badly deteriorated in very short order.

Tow can be safely used on our flexible gun tow jag described above because when soiled it can be easily removed.

Postage 9d.

JOHNSON'S WAX GUN-STOCK POLISH

1/9 per tin Postage 9d.

For application to gun or rifle stocks. Also effective as a dressing and preservative for gun cases and similar leather goods. It penetrates skin-deep and there remains slowly hardening as time goes on and imparting a rich transparency to wood.

It effectively prevents all tendency to exudation and permanently preserves the smooth surface on a gun or rifle stock.

It is immensely important to sportsmen that the wood composing the butt and fore-end of their weapon should be protected from the warping caused by damp. The wax excludes moisture and so promotes a high degree of stability.

ACCESSORIES

"Acme" Whistles and Calls

No.	Type of Call	Method of using Call	Price
251	PARTRIDGE	The fingers must be well resined and dragged down cord as follows: strong pull immediately followed by a series of short ones.	7s. 7d.
259	CROW, MAGPIE, ROOK	Long "caw" reproduced by steady blow, gripping flexible jaws with teeth and by holding base with half-closed hand.	7s. 7d.
267	RABBIT SQUEAL (Fox Decoy)	Blow strongly to produce a high-pitched squeal, dying down, with hand closed over end to muffle sound, thus imitating a rabbit in fright.	7s. 7d.
281	QUAIL, STOAT, BLACKBIRD	Quail and blackbird: Quick sharp squeezes on rubber bulb. Stoat: The cry resembles the beating of two flints together. Hold the bulb in one hand and tap it sharply with the knuckles of the other.	7s. 7d.
283	GROUSE HEATH, MOOR and WATER HEN	Blow to produce a series of short, sharp, staccato notes.	5s. 10d.
447	SNIFE REDSHANK SANDPIPER OYSTERCATCHER (Call of most of the waders)	Snipe: Short hurried blows. Redshank: Render a series of plaintive whistling notes. Sandpiper: Similar to redshank, only longer and more trilling, interspersed by low mournful notes. Oystercatcher: Sharp strong note. Waders: The notes of waders are similar to each other. The only way to imitate their cry is to hear the actual bird.	3s. 6d.
572	DUCK, TEAL, WIDGEON	Hold end of call with clenched hand and open at the commencement of each blow, "kwa-kwa-kwa" (this call does not reproduce the whistling note).	10s. 3d.

Postage 6d. on all Calls

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C.2

ACCESSORIES

250

263

266

553

265

Pattern No.	Type of Call	Specification	Method of using Call	Price
250	DEER and ROE KITTIWAKE GULL, ANTELOPE	Black plastic body, fitted with brass reed.	Blow strongly (with lips tensed), "strangling" the sound by clenched hand over end of call. This will produce a squealing note.	7s. 7d.
255	HARE and FOX	Brown plastic body and mouthpiece with brass reed.	Blow in similar manner to pattern 250 giving short, sharp blows to produce a bleat. (For Fox Decoy see Rabbit Call No. 267, page 63.)	7s. 7d.
261	GOOSE	As 255 but black.		
263	JAY	Black lacquered brass throughout.		5s. 10d.
265	BIRD of PREY HAWK, LAPWING BUZZARD OWL GULLS (Herring, Common, etc.)	Black plastic with cork reed.	B'rd of Prey, etc.: Two short blows (as "Vee-Vee"). Buzzard Owl: Several steady blows. Gulls: The familiar Gull is blown softly, producing mournful note, which rises quickly to a wail, occupying about three seconds. The other Gulls can only be imitated by hearing the actual note of the bird.	7s. 7d.
266	OWL	Black lacquered brass tube, erinoid mouth-piece and brass reed.	Close end completely with clenched hand. Steady blows increasing in intensity to produce higher note at end of each call.	7s. 7d.
553	CURLEW PEEWIT	Black plastic with steel nickel plated split ring.	Blow with finger closing stophole. Remove finger towards end of call to obtain final higher pitched note. (As "Cur-lew, Curr-lew.")	6s. 5d.

Postage 6d. on all Calls

THOMAS BLAND & SONS, 4-5 WILLIAM IV STREET, LONDON, W.C. 2

ACCESSORIES

"Acme" Whistles and Calls

Pattern No.	Type of Call	Specification	Method of using Call	Price
254	BLACKBIRD LARK, SKYLARK SWIFT WILD FOWL WOODCOCK WILLOW WARBLER, etc.	Black plastic body with black cellulosed brass base.	Blow lightly, giving quick, short, "chattering" notes. (Vary, according to call that is being imitated.)	8s. 0d.
286	PLOVER	Black plastic body with steel nickel plated split ring.	Blow "Clee-o" by moving finger on to the stop-hole during course of one blow.	6s. 5d.
446	CUCKOO	Black plastic body with brass nickel plated cap.	The well-known two-note call of the Cuckoo is obtained by leaving the stophole OPEN for the first blow and by CLOSING it with the finger for the second.	10s. 3d.
446 1/2	DOVE, PIGEON	Black plastic body with wooden cap and steel nickel plated split ring.	Soft, gentle blow, dying down, to produce familiar "Coo-oo."	14s. 0d.
499	NIGHTINGALE	Brass water container with mouthpiece and cover, and filler cap. Nickel plated throughout.	Remove filler cap and mouthpiece cover. Fill 1/4 full with water. Blow gently and firmly. Obtain "trills" by vibrating tongue (as in pronouncing "r-r-r-r"). Only replace cap-screw and cover AFTER use, thus keeping the instrument water-tight.	10s. 3d.
504	WIDGEON BIRD WARBLER	Polished tinplate.	Hold against lips and breathe out AND IN.	7d.

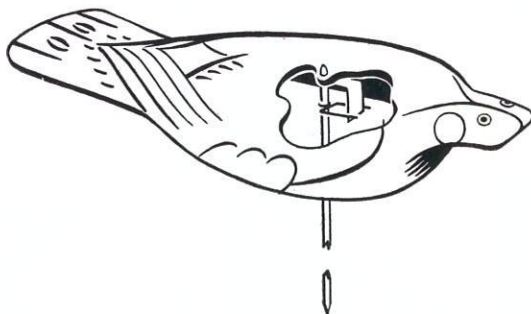

Postage 6d. on all Calls
